

Consultant (f/m) Software Development C++

Your tasks...

You are responsible for the consultation, conception and implementation of demanding projects and solutions in the field of software development. Through direct customer contact you support our international and professional teams focussing on C++. The analysis of existing business processes, as well as heterogeneous soft- and hardware infrastructures are as much part of your area of responsibility as are the development, implementation, testing and documentation of software components based on the programming language C++, taking into account the customers' professional and technical requirements. In doing so, you will access industrial standards and current trends in order to develop sustainable solutions and ensure their quality.

Your profile...

In addition to a degree in computer science or a comparable training you have several years of experience in the conception and implementation of big software development solutions based on the programming language C++. To you, new technologies are a challenge and you systematically pursue innovative concepts. Preferably your main expertise lies in the following areas:

- Very good programming knowledge in C/C++
- Very good experience with C/C++ in the client/server environment
- Experience in the use of and working with data bases (e.g. Oracle, MySQL, etc.)
- Knowledge of at least one data quality assurance system
- Knowledge of at least one standardised procedure model
- Experience in the field of implementation
- Experience in the realisation of module/module-group tests
- Experience in data processing, design and modelling
- Object-oriented modelling
- Experience with GUI libraries (e.g. MFC, Qt, Ilog Views), as well as design patterns and frameworks
- Development processes (e.g. demand/error management, configuration management, build processes).

Furthermore you have very good analytical and communicative skills, work target-oriented and like to take the initiative and shoulder the responsibility in difficult situations. A convincing manner as well as your strength in team-oriented work distinguishes you further. A high degree of customer and service orientation is natural to you. Good knowledge of written and spoken English round off your profile.

If you are interested in joining an international and dynamic team, please send your resume in English with reference to the following e-mail address: job@axisplus.de
