

Team Manager (m/f) J2EE Architecture

Your tasks...

As team manager you are equally responsible for consulting, conception and implementation of demanding projects and solutions within the field of software architecture, as well as the acquisition of new and the support of existing customers. Within the project business you support our international and professional teams through direct customer contact, amongst others, focussing on J2EE development and modern architecture approaches.

Your tasks include the analysis of existing business processes, software and hardware infrastructures, as well as the conception, design and implementation of software architectures while taking into account your customers' professional and technological requirements. In doing so, you make use of industrial standards as well as most up-to-date technologies to develop innovative and sustainable solutions, and to ensure their quality.

Simultaneously you are responsible for the composition and extension of your team within the field of J2EE architecture. This includes the development of a service portfolio of your team, as well as the acquisition and support of further customers. You have an excellent market overview within the field of J2EE architecture and you will successfully position your team within this field. Furthermore, the employment of new colleagues is equally part of your tasks as is the professional and disciplinary lead of the further development of your team.

Your profile...

In addition to a degree in Computer Sciences or a comparable training you have at several years of experience in the conception and implementation of big software architectures. To you, new technologies are a challenge and you systematically pursue innovative concepts.

Your main experience will preferably lie in the following areas:

- IT architectures and methods (SOA, ESB, EAI, Web Services, OOA, OOD, RUP...),
- Platforms and products (IBM Websphere, Bea Weblogic, JBoss, Oracle, Tibco, WebMethods, CapeClear ...),
- Software development and frameworks (J2EE, SQL, Hibernate, Struts, JSF, axis ...),
- Requirement analysis, allowance and project leadership for software developments.

Additionally, you have had the chance to gain first experiences in strategic and organisational consulting.

On top of your experience in the professional project business the acquisition of new customers and the support of existing customers is part of your day-to-day business. You have an active customer network, which distinguishes itself through personal contacts at decision-making level. This is complemented by funded knowledge in the creation of offers, as well as extensive experience in contract negotiations.

In the past you demonstrably were responsible for the professional and/or disciplinary lead of medium-sized teams, and your colleagues value you as a manager due to your high professional and social competences.

You have very good analytical and communicative skills, work target-oriented, and like to take the initiative and shoulder the responsibility in difficult situations. Convincing manners as well as the capability to work team-oriented distinguish you further. A high level of customer and service orientation is natural to you. Good knowledge of spoken and written English round off your profile.

If you are interested in joining an international and dynamic team, please send your resume in English with reference to the following e-mail address: job@axisplus.de
